OUR EXPERTISE

03

SIRS Flagship is on IT services especially in the area of System Integration, Software Development, Cyber Security, Project Management, Training and Consultancy, ICT Leasing Services

OUR EXPERTISE :

P 18-22

We promise to bring an exclusive experience when working with us, by delivering innovation, creativity and ideas to power up your business.

SYSTEM INTEGRATION :

EXPERTISE :

WE ENSURE YOUR LAN/WAN AND SOFTWARE ENVIRONMENTS RUN SMOOTHER WITHIN YOUR BUSINESS PROCESS.

In Business Modern Era, "Information Technologies" have encompassed many aspects of professional fields such as Management Information Systems, Computer Networking, and Software Design. Our professional spectrum covered your network performance, communication, and connection with the end users. We work closely with you to understand your business environment, work processes, and current applications; SIGMA was backed by professional Technical expertise that helps us find solutions to make your company succeed. We can fathom the good impact and we believe this integration will enhance your productivity, and performance and invite more fortune.

WE ANALYSE AND EVALUATE YOUR CURRENT NETWORK ENVIRONMENT TO BE MORE INNOVATIVE, RELIABLE AND SECURED.

Our consultants lead you to assist the process and create a productive environment for your business, supported by documentation of all processes, knowledge transfer, and other material needed to make sure the project will succeed. Our services help you address a complete network analysis or design project or can aid you on an as-needed basis in the event you have lost data, experience backup errors, or have had trouble accessing the network from local or remote locations.

SIGMA will fulfill what your Local Networking needs and unwavering desire to help you through deeper consultancy and engineering expertise in the operating systems and applications to power your business and get your network in shape.

SOFTWARE DEVELOPMENT :

EXPERTISE :

The manifestation of software development is to improve your software management and we will ensure it runs smoother within your business process. The need for better performance is important and most businesses are aware of this, that is the reason why most local enterprises hired us to cooperate with them, either to enhance the existing system or build the new one. Software development is the business requirement to enhance performance, productivity, and efficiency.

Our professional team is driven by the objective of providing customers with the state of the art software and innovative business productivity solutions. Our professional team comprises the pioneers in e-commerce and possesses a track record of having developed and delivered e-commerce and large-scale IT projects successfully in the past.

We believe our expertise is ready to serve you with better services through programming, design, and consulting with the best value. Our highest quality services are driven by customers' comfort, cost benefits, schedule, budgetary, and security Issues. The services offered include :

Application development to perform product customization and provide integration interfaces to legacy systems

Design and development of website and web portals

Data conversion and migration

PROJECT MANAGEMENT :

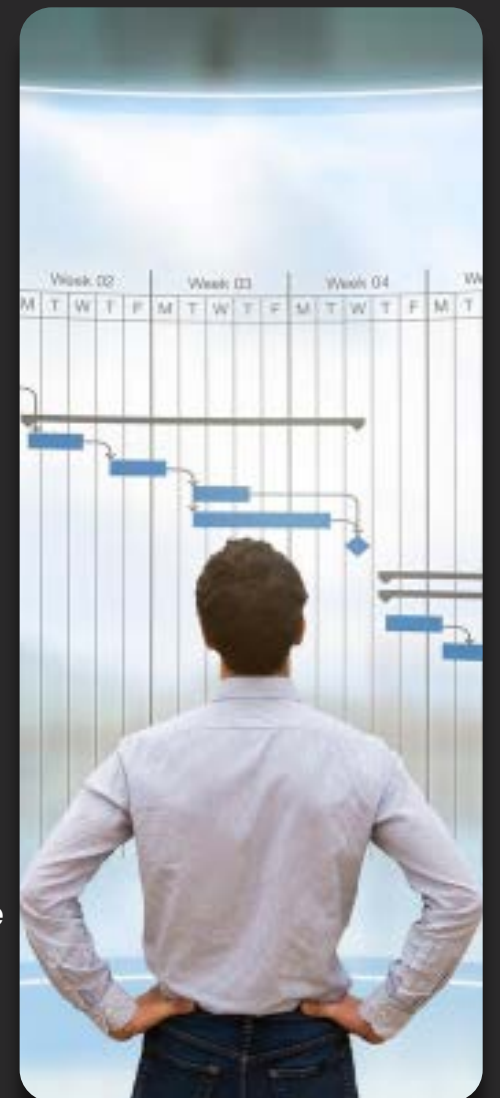

EXPERTISE :

Project management is one of our expert fields that is driven to carry out the project successfully. SIGMA is committed to satisfy your needs and together we bring you the best solution to power your business. From the start until completion, we will serve you with a better service including knowledge transfer, sharing skills, experience, etc.

According to several international studies, almost 50% of IT projects are run over time and budget. A total of 1 over 4 IT projects did not meet the actual implementation. this low success rate is caused by the poor visibility of IT project status and a lack of management control over them. Michael Krigsman from the article 'Beyond IT Failure' explains that The primary reasons for the budget over-spend are as a result of poor forecasting (50%), project scope increasing during implementation (39%), and issues of interdependencies and conflicts between multiple projects (36%). This isn't helped by the lack of visibility and control that CIOs IT directors don't have complete visibility over the initiatives they are running, so cannot see when projects are threatening to run over budget.

Indeed there's more to successfully transferring ideas and business needs into a fully implemented application than developing skills alone! In the complete projects that are assigned to us, all of our expertise and experience regarding project management, business and functional analyses, functional and technical design, planning, development, testing, documentation, user education, implementation, and software maintenance culminate into what differentiates us from most of our competitors.

Our Project Coaching model offers the solution for turning your IT department into a skilled and experienced project team, without the risk of sacrificing the projects on the route toward this goal, having to live with the consequences of unfortunate decisions at the start for many years to come, or damaging managements and end-user confidence in IT department and applied technology beyond repair. In this solution, we aim at transferring our vast knowledge and experience to your team as fast as possible, so they can become independent as fast as possible.

We draw upon our significant knowledge and expertise of mission-critical and data center environments, technology, and operations to provide a collaborative approach to maintenance and support throughout the lifetime of your infrastructure.

Online Maintenance Services

Our Data Centre Maintenance & Support Services Team delivers a comprehensive range of expertly planned preventative maintenance, 24x365 emergency call-out, energy optimization, and enhanced support services. UPS, generator. Fire suppression, environmental, monitoring, management, and associated mission-critical infrastructure.

Consultancy, Survey and Audit

With years of experience in designing, building, and managing mission-critical data center design, providing a range of survey and audit services specifically focused on the optimization of your data center assets.

Critical Facility Management

Managing daily data center infrastructure operational challenges associated with complex technology and multi-vendor relationships can be frustrating and time-consuming, depriving you of precious time to focus on what is important. Clients are challenged with maintaining a full range of data center infrastructure while addressing budget pressures, critical project deadlines, and shortage of skilled resources. Opting to outsource your entire data center environment or parts facilities management or thereof to a trusted service provider is a smart alternative.

Remote Monitoring

24/7 Remote Monitoring service designed to view your mission-critical infrastructure. Our Technical Support Team will monitor and investigate alarm conditions as and when they occur, diagnosing, fixing where possible and arranging for site attendance when deemed appropriate by invoking the 'Support' contract SLA on behalf of the client.

Due to unforeseen demand for skilled and highly trained information technology professionals, We are taking a step ahead towards preparing the best breed by focusing on the industrial Based Training ICT Industry.

Our selective professional instructors felt grateful enough to deliver and share the experience they had and they are constantly keeping up with the latest changing technologies. We make every effort needed to give our students the hands-on experience they needed and solve problems from a real-life situation, since we believe that book knowledge is not enough. This practical and realistic knowledge gives the students the best environment to learn. More than just a certificate, we make it our mission to provide our students with the hands-on experience desire. With technology expanding and changing so rapidly, corporations throughout the world need experienced and knowledgeable engineers to compete in the aggressive technology the world need experienced and knowledgeable engineers to compete in the aggressive technology marketplace.

The backbone is a balance between two principles:

1) Subject Matter Expert Instructors:

We employ the best and most experienced instructors in the field. We believe that to give the students the best information and instruction, you must have years of best information and instruction, you must have years of practical knowledge to their students. In addition, our instructors are constantly keeping up with the latest changing technology.

2) Advance Training Programs :

We can deliver Official Vendor Curriculum, workshops, or accelerated Quick Tracks - a curriculum that will provide extensive lab, working-world scenarios - the best resource of information for "real life". We believe book knowledge is not enough. We make every effort needed to give our students the hands-on experience they needed.

RASPBERRY PI WORKSHOP

Cyberjaya Community Toastmasters (CCTMC) was founded by Sigma Rectrix Systems since 2015. Currently, we are under district 102. Toastmasters is a Self-Development club, members support members in the area of Communication and Leadership Skills. Our club will start from 7:15 pm - 9.30pm every 1st week and 3rd week of the month. Everyone is welcome to join our meeting, it's a pleasure to embrace a new guests and members to our club.

TOASTMASTERS INTERNATIONAL

If your kids are addicted to computer games, gadgets, and anything related to technology, this workshop will be suitable for your kids. This Workshop is fun and filled with activities to further stimulate their interest in computing and programming. Moreover, we could create young inventors that are creative and innovative from common kids with general computer knowledge. Come and join us!
