Video Analytics and Artificial Intelligence

Presently Video Content Analytics (VCA) and Artificial Intelligence (AI) are coming into the security especially in the CCTV installation rapidly now. Camart Sdn Bhd is ready to support our customers and users with the advance solution. Our solutions come from Genius Video Digital, Eocortex and CQR/Dahua products. These products adopt the most advanced AI technologies, including deep learning algorithms that primarily target people and vehicles, which provides higher flexibility and accuracy for end-users. This enables us to support various advanced applications such as face recognition, ANPR, metadata collection and analysis, people counting, image search, facial flow, traffic incident detection, traffic data statistics, etc.

Our VCA & AI products include network (PTZ) cameras, network video recorders, servers, and more devices. Our VCA & AI solution products provide a better way of understanding it.
